PhD position in Supramolecular Chemistry and Materials
Universitat Jaume I

A 3-year PhD position, funded by the GVA – Grisolia Program, is available at the Bioinspired Supramolecular Chemistry and Materials Group at UJI, led by Prof. Beatriu Escuder working on supramolecular gels at the interface between Chemistry and Biology.

Research Topic: Multicomponent peptic supramolecular materials for transdermal drug delivery.

Eligibility criteria: (detailed criteria online (Spanish only) or upon request)

- BSc or Eng degree after January 1st 2016 by a non-Spanish institution.
- Master degree or equivalent that grants access to doctoral studies.
- Good language proficiency (Spanish or English).

Specific Requirements:

- Master degree in Chemistry, Chemical Engineering, Biochemistry or similar.
- Basic background in Organic Chemistry and/or Supramolecular Chemistry will be considered.

Starting date: October 1st 2020 (exceptionally, January 16th 2021 due to visa delays)

Application procedure:

Candidates should send the following documents to escuder@uji.es, as soon as possible and not later than June 30th 2020.

- Motivation letter.
- Brief CV (including academic record summary)
- Name and email of one/two references.
