

Postdoctoral Research Position in Supramolecular Chemistry and Molecular Materials at the Universidad Autónoma de Madrid

We are looking for motivated scientists to work in the interdisciplinary *Nanostructured Molecular Systems and Materials* group (MSMn) at the *Institute for Advanced Research in Chemical Sciences (IAdChem)* in the Universidad Autónoma de Madrid.

	Postdoc Position
Application Deadline	15/07/2022
Expected Starting Date	Anytime between 01/09/2022 and 01/04/2023
Duration	2 years (1+1)
Main background	Supramolecular Chemistry
Additional experience (positively considered)	- Synthetic Organic Chemistry - International postdoctoral stays will be positively evaluated
Requisites	- PhD Title - Excellent English level, writing skills - Motivation
Research Focus	Study of molecular systems that self-assemble into defined nanostructures with applications in organic electronics, molecular recognition and catalysis, and advanced materials.
Funding Project	<i>Novel Functional Systems and Materials from Molecular Self-Assembly</i> (FunAssembly - PID2020-116921GB-I00)
WebPage (additional info)	https://msmnlab.wixsite.com/dqrlab

Applications should be submitted to: david.gonzalez.rodriquez@uam.es including:

- **CV** with publications list and contact details of at least two referees
- **Optional:** motivation letter, research summary, recommendation letters, etc.
