

Job opening for Programa Investigo at Oniria Therapeutics

## Laboratory Technician in Life Sciences I

[Oniria Therapeutics](#) is a biopharmaceutical company in the field of precision oncology. It develops first-in-class therapies to modulate and eliminate dormant tumor cells as a novel targeted strategy to overcome their persistence and improve patient lives.

The company was incorporated in 2021 as a Spin-off of the Vall d'Hebron Institute of Oncology (VHIO), the University of Barcelona (UB) and Catalan Institution for Research and Advanced Studies (ICREA) by Dr. Héctor G. Palmer, Dr. Isabel Puig-Borreil, Dr. Xavier Barril, Dr. Carles Galdeano, Dr. Josep Tabernero and Esther Riambau. It is supported by national investors and organizations in the healthcare and life science sector. The company is located at the CELLEX CENTER, in the Vall d'Hebron campus.

### Job description

We are seeking a motivated Laboratory Technician in Life Sciences to join our interdisciplinary team to develop new agents designed to modulate tumor dormancy to fight cancer progression. The candidate will participate in a highly translational project with interactions with academic institutions, industry and clinicians.

It is a great opportunity to gain drug discovery and development experience and in the following key tasks:

- Execution of in-vitro, ex-vivo and in-vivo efficacy experiments of the selected candidates under the supervision of the Lab Manager and the Research Scientist in Life Sciences of the company.
- Execution of experiments to understand the mechanisms of action of the compounds on the new targets selected.
- Participation in the company's scientific meetings and in the interpretation of data.
- To maintain the equipment and facilities of the biological research laboratory and the Laboratory Standard Operating Procedures.
- To ensure the quality of all the experiments carried out in the biological laboratory.

This position is related to the Investigo grant of which Oniria has been a beneficiary.

### Requirements

- Must have:
  - Higher national diploma (FP2) of Laboratory Technician in Life Sciences
  - Be under 30 years old
  - Good teamwork and interpersonal skills, as well as independent, motivated, and collaborative person

Finançat per

- Nice to have:
  - FELASA animal handling accreditation
  - Life Science Bachelor or Master in biology, biochemistry, or related discipline.
  - +2 years of previous experience with molecular biology techniques & mammalian cell culture and flow cytometry assays.

#### We offer:

- Full-time contract in an exciting biotech start-up international environment.
- Continuous training in a high-quality scientific environment
- Good working atmosphere
- Expecting starting date: June 2023
