

## Position Available: Head of Organic Synthesis

### Centro de Química Aplicada y Biotecnología (CQAB), Fundación General de la Universidad de Alcalá (FGUA)

A position is available for a PhD holder in Organic Chemistry to lead the Organic Synthesis Area at the Centro de Química Aplicada y Biotecnología (CQAB) at Fundación General de la Universidad de Alcalá (FGUA).

The selected candidate will coordinate a team of researchers working on collaborative research projects between industry and academia. The role involves managing, designing, writing, and developing projects focused on the synthesis of organic molecules and polymers at various scales.

#### Requirements:

- A PhD in Organic Chemistry.
- At least two years of postdoctoral experience abroad.
- Proven experience in leading teams and/or supervising Bachelor's and Master's theses (TFG and TFM).
- Extensive knowledge on structure elucidation based on Nuclear Magnetic Resonance (NMR).
- Experience in project and report writing.
- Proficiency in written and spoken English.

**How to Apply:** Interested and highly motivated candidates should submit their application including the curriculum vitae (CV) to Prof. Dr. Manuel A. Fernández-Rodríguez (mangel.fernandezr@uah.es) no later than December 10th, 2024.
