

Job Offer – Predoctoral Position (4 years)

Translational Chemical Biology Group – CNIO (Spanish National Cancer Research Centre)

Group leader: Dr. Gonçalo Bernardes

We are seeking a highly motivated predoctoral researcher to join the Translational Chemical Biology Group at the CNIO. The project is associated with the National Plan and focuses on cutting-edge research at the interface of chemistry, chemical biology, and translational science.

Position details

- Duration: 4 years
- Estimated start date: 1 April, with the possibility of an earlier start
- Funding: Fully funded predoctoral contract
- Location: CNIO, Madrid, Spain

Candidate requirements

- Bachelor's and Master's degree in Chemistry, Biomedicine, Immunology or a related field from a recognized university; a background in Chemistry will be particularly valued.
- At least one year of research experience in chemistry, chemical biology, or related fields.
- Experience in chemistry and/or chemical biology, preferably related to peptide or protein synthesis.
- Experience in synthetic chemistry.
- Demonstrated experience in drug testing assays and enzymatic assays.
- Experience in cell biology and cell culture techniques is desirable but not essential.
- Scientific publications will be considered an asset.
- Fluent English (C1 level or equivalent) is required.

How to apply

Interested candidates should send the following documents to aelbakkali@cnio.es:

- Curriculum Vitae
- Brief motivation letter (optional)

Email subject: FPI_CV
