

## 4-Year PhD Position at the Rivero-Crespo Lab

### Multicatalysis with Metal-Organic Frameworks

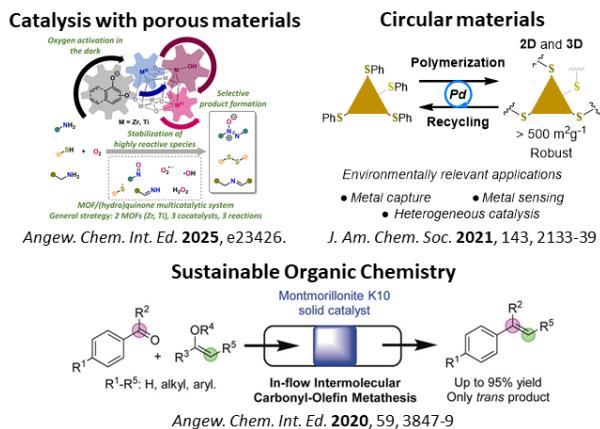

Looking for an exciting research opportunity in sustainable chemistry? Look no further! Join our team and take your career in science to the next level! We are looking for talented researchers to join the Miguel Rivero-Crespo's group as Postdocs at the Department of Chemistry of Stockholm University, one of the best Schools in Europe!

We are building a diverse, interdisciplinary and dynamic research group working at the interface between organic chemistry, materials science and catalysis, and we strongly encourage applicants from all backgrounds to apply. You will have the opportunity to work in a multidisciplinary, international, and collaborative environment where you will be encouraged to learn new techniques and to think outside the box.

#### Research areas and philosophy

#### Selected examples

As part of our research group, you will benefit from working in a great institution with cutting-edge facilities and infrastructure.
